

VividCoater XDC 480M (Manual Feed)

The 480M is a manual feed UV coating system that produces uncompromising quality in finished pieces while protecting against friction and fading. Compared to conventional solvent based coatings the VividCoater produces virtually no Volatile Organic Compounds and provides a more effective and lively printed piece at a very low cost per page. The VividCoater Series versatility enables users to run our UV Coaters inline with any creasing or feeding unit.
